Versatile **Software Engineer** with a **Master's in AI** (UCLouvain) and a background in **Technical Art**. Awarded the 3rd **IEEE/ICTEAM Best Master's Thesis** for LLM research, I specialize in building complex, maintainable systems. From tutoring IT to **managing major rollouts**, I combine high-level technical rigor with a strong focus on **system architecture**, user interfaces and production efficiency to solve complex challenges.

Resume

Education

- Master's in Computer Science - AI** UCLouvain 2022 - 2025
 Bridge program and master's in computer science (Artificial Intelligence Specialisation)
 ↳ **"Large Language Models as RPG Game Masters"** Master Thesis
 3rd 2025 IEEE/ICTEAM Best Master's Thesis Award 🏆
- Degree's in Technical Art** Haute Ecole Albert Jacquard 2019 - 2022

 Four-month internship as a technical artist working on the production of Outcast 2.
- La Sucrerie** Jobber + Application Programming 2019 - 2025
 Programming the bar management application.

Software

- Python / Java / C#
- Git / Perforce

Languages

French: **Native**
English: **Fluent**

More

- Driver's license (B), with a car
- Can work on-site or remotely
- I was a scout animator for 7 years, so I know how to organise, supervise and resolve conflicts... between 12 tired children, in the rain, with just one roll of toilet paper.
